Best wishes for a happy New Year

Issued the ninth issue of the Saaed magazine after a year of harvest Efforts to promote traffic culture in the community through Methodology of community outreach with all official institutions And civil society organizations at the state level in the framework of Strategic partnership with Abu Dhabi Police.

Amounted programs provided by Saaed Association to reduce the toll Traffic accidents last year in 2014, about 150 lecture awareness Traffic and organize an exhibition about 12 benefited from an awareness of these programs About 15 208 people.

And welcome the new year in 2015 helped the implementation of many programs Awareness and initiatives that promote its mission, vision and goals to Seeks to achieve in raising awareness of traffic and culture, and we hope Achieve greater achievements in the new year aimed at activating Traffic culture and promoting the role of family and community in maintaining Traffic on toxic by adhering to the law Traffic And safe driving on the roads.

Editor in Chief

Lieutenant Colonel / Jamal Salem Al Amrey

Within the popular councils Schools Initiative

Saaed Association enhance traffic culture through the 16 council popularly

Abdullah Mohair Al Kitbi Council HE

To promote the values of thoroughbreds society and the consolidation of the customs and traditions, Traffic and Patrols Directorate launched in coordination with helped Association to reduce traffic accidents, "initiative" assemblies Schools traffic awareness "and lectures and movies awareness and illustrations of traffic in the 16 council popularly councils symbols include the community in all of Abu Dhabi and Al Ain, including promotes culture traffic.

And was the beginning of these initiatives Council Suhail bin Mohammed Al Marar and the Council of Khalid bin Tnav Manhali in Bani Yas and the Council Abdullah Mohair Kitbi in Abu Dhabi and the Council Mofleh Ben Ayed Ahbabi in Al Ain City and the Council Mohammed Boukat Ketbi in Al Ain City and the Board of Mohammed bin Abdullah Al Rumaithi Balsmahh and Council Saeed Mohammed Al Rumaithi in Al Ain City and the Council Akhitt Swidan Nuaimi in Al Ain City assemblies included tribal elders and community codes and various factions in the presence of all age groups, which discussed the straightforward

proposition about traffic safety issues and raising community awareness of the need for compliance with the Law traffic.

Discussed assemblies traffic awareness importance of traffic safety and caused traffic accidents of human social and economic losses and the effects of a negative on the community, and the strategy of the Ministry of Interior for Traffic Safety, and what has been achieved positive results to reduce traffic accidents and the resulting, sing of deaths and injuries, eloquent, and the role of community and family in maintaining traffic Safety.

assemblies also touched on some of the negative behaviors by some young people of recklessness "and Sliding horrors " and the need to contribute to the local community in the reduction of these negative phenomena, the participants stressed the Popular proposed importance adopted by the Directorate of Traffic through these councils so as to enhance direct communication between the boards traffic and society and contribute to the consolidation of culture and community awareness of traffic.

Saaed Association deepen community outreach through «group meeting»

HE Mofleh Ben Ayed Ahbabi Council

Saaed Association Deepened in coordination with the Traffic and Patrols Directorate of Abu Dhabi Police traffic culture through a program (Team Meeting), organized recently in Abu Dhabi Family Development Foundation to deepen communication and cohesion among members of the community

Jamal Salem Al Ameri executive director of the Saaed Association said the traffic awareness program "Team Meeting" event is part of the interest in providing security, traffic for the family as a main ingredient in the community, which is reflected by the negative effects of the direct results of traffic accidents from the social and economic aspects

He said that the post helped traffic in the community program has been prepared to suit all family members through a combination of traffic awareness programs that benefit children and adults

and educational programs, games and entertainment, and entertainment includes traffic competitions for children punctuated by providing valuable gifts to the winners

He said the focus through "Team Meeting" to abide by the law of Traffic and the role of families in promoting efforts to reduce the negative behaviors by some youth of driving without a license market and recklessness and exceed the legal speed and connecting a seat belt and overtaking from shoulder road punishable by up to book the vehicle for a month and a fine 1600 dirhams and 18 traffic points, and transferred to the prosecution in the case of a repeat offense, and warned them to overcome a red light, which punishable by up to reserve the vehicle for 15 days in addition to recording 8 traffic points and a fine of 800 dirhams

Positive interaction with Saaed Association platform Association at GITEX and Gulf Traffic

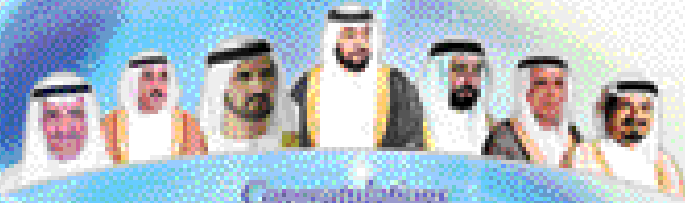

Received Platform Association helped to reduce traffic accidents positive reaction from participants and visitors of the session, "35" GITEX and Information Technology Exhibition Gulf Traffic who was recently organized in Dubai World Trade Centre. Through the platform of Abu Dhabi Police traffic within its strategic partnership with the traffic to enhance the prospects of community partnership and systematic societal communication between all segments of society.

Commenting on these posts Lieutenant Colonel Jamal Salem Al Ameri Executive Director of the Association "Our participation is based on these events to the great importance of involving these international exhibitions, one hand is serving orientations Assembly in communication with the public and create a state of creative interaction that would dedicate the homeland and the citizen service optimally, which reflects the trends of our wise leadership, in addition to opening more doors of cooperation with the concerned authorities of traffic safety and companies operating in the transport and traffic sector and in the field of roads and transport

According Al Ameri that the Association participated through its platform displays movies and traffic

competitions and distribution of the magazine helped to visitors, as well as to communicate with the public so as to enhance traffic culture among the public in addition to the public about the law of Traffic and urged them to adhere to speed limits and the use of seat belts and all traffic laws and traffic.

Al Amiri said that the Assembly is working within the framework of a strategy to focus on what caused traffic accidents of human and economic losses and social have negative effects on all aspects of life implications, where crystallized that vision in the preparation of an integrated program of action whereby intensify their participation through a variety of activities and events targeting all segments of society.

Driving license

Conditions that must be adhered to by the driver

1. Stand in designated places for people with special and distinctive paintings and painted white and blue needs.

2. Put the permit (original) behind the windscreen of the vehicle clearly.

3. Inform the Traffic and Patrols Directorate of Abu Dhabi Police within 48 hours of the loss of the permit

4. Maintain the permit and not misused or given to other people and restrict its use in private vehicle with the presence of the disabled when ascending and descending.

5. Prohibits filming permit the use of the image and displays the offending same offense and the withdrawal of permission.

6. Allows disabled facilities to stand for 3 hours max

Stand in violation of the disabled parking

The text of the law (in violation thousand dirhams and 4 traffic points parking of vehicles in front of the fire nozzles allocated places for people with special needs and ambulances).

The number of irregularities, which was liberated by the Directorate of Traffic and Patrols over the last eight months of the year 2014 amounted to about 3135 violation.

Digital technology and traffic safety

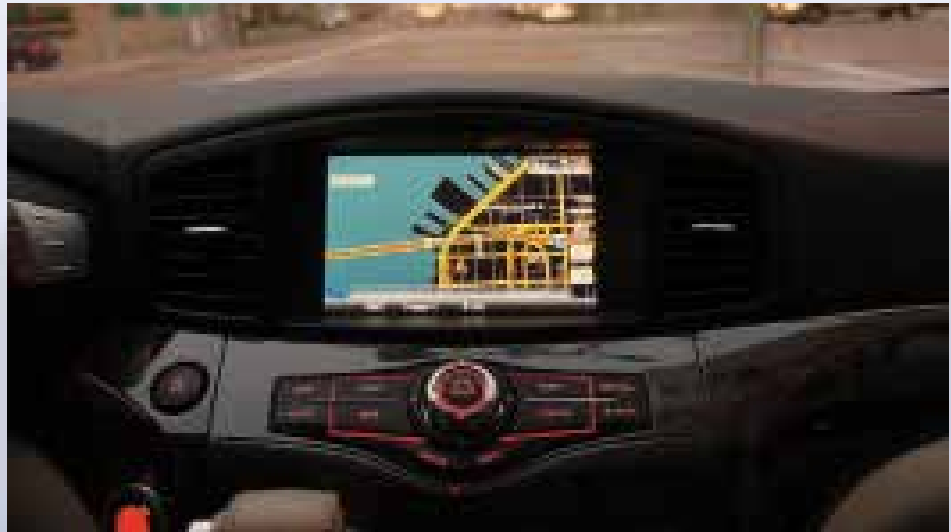

Said researcher Mahmoud Mohammed Abdul Qadir in his paper presented at the International Symposium for Traffic Safety, which was organized in Abu Dhabi recently entitled "The impact of the rationalization of the use of digital technologies to achieve the highest rates of traffic safety," the contribution of digital technologies in providing vehicles with many of the comforts and safety, has competed producers vehicles in the last two decades as supplied to the vehicle of techniques contribute towards the driver and passengers more convenience and comfort while driving the vehicle or ride where, on the other hand give more security to the use of the vehicle, even become a trade-off between the vehicle and the other for the buyer is the amount supplied to vehicle technologies to provide comfort and luxury or increase the rates of safety.

- The recall of those techniques, for example, provide the vehicles navigation systems (GPS), which the driver to determine the course during the trip had to be, and being able to identify the final leg if unknown to him, and also of those techniques that give the driver the possibility of using CDs to listen to a high degree of purity of the substance and the possibility of controlling the sound output in terms of amplified, as well as the possibility of the use of CDs in the presentation of visual materials.

- Were numerous digital technologies that have been used in the vehicles until Pat is counted from difficult, and became listening to the news of modern digital technologies of the things that attract attention techniques for alarm deviation from the tracks the way, and control the vehicle speed and other techniques have earned vehicles large momentum in achieving the safety of the driver and passengers alike.

- If these digital features that provide the vehicle has facilitated a lot of the driver and passengers of the vehicle to enjoy many of the programs that are not accessible to them enjoyed only by larger devices are available only in a fixed place and through a wired or wireless connections certain, it has become now available to the driver and passengers of the vehicle in every sense of the pros and cons, or in other words, of the benefits and risks.

2. digitization techniques and achieve safety by regulating the flow of traffic:

- Intervened digital technologies also in ensuring traffic safety through use in the control networks in the optical signals in pursuit of maximum utilization of the infrastructure, Achieving liquidity traffic on the main roads is linked to the existence of a system relay optical signals to achieve this liquidity, and modern use of digital technologies in the drawing Digital Network for all the traffic signals at the level of the city gathered in the special movement of vehicles and density and trends through a network of sensor networks that transmit information to the control center to be through this information to control the light signals data, leading to the liquidity of the roads and axes movement, and thus reduce the chances of accidents as a result of traffic congestion.

0.3 digital technologies and achieve safety through the investigation of traffic accidents.

Procedures must vehicle commander be followed

1. while driving at the time of sunset must use the vehicle's lights though it does not help the driver of the car on the vision by which they help others to see the car while walking and so the leadership during the sunset of the most dangerous periods of leadership due to the lack of adjustment was appointed commander of the vehicle with low-light

2. dazzling light lead to temporary blindness optical amount of seven seconds, so you should not use dazzling light while the cars in the opposite direction, but must use low-light and speed calming.

3. Light leadership enables the commander of the car vision for a distance of 150 meters and low light provides visibility for a distance of 30 meters and so the driver of the car must not exceed the speed lights front lights of the vehicle and must be on the driver of the car that runs as fast as being able to stop the car at these distances.

4. You must use a solar car if you are going in the direction of the sun or wear a good pair of sunglasses.

5. While driving long distances should be on the driver of the car to take a simple break every two hours driving... The maximum duration of the commander of the car can be driving eight hours per day.

6. should the driver of the car to leave a safe distance between the car and the car in front of him the amount of four meters per ton kilometers speed, at least, as well as the safety distance side between his car and the car next to 50 cm and that under normal circumstances must multiply these distances while driving in non-circumstances natural (rain - fog

- Storms - wind etc.)

7. driving in rainy skies should rain spaces are valid and in good condition and should double front and side safety distance as well as the non-use of the brake violently and tires are in good condition and that the car's windshield is closed to ventilate the car as it should calm down quickly.

8. In the case of driving in the fog should be on the vehicle commander calming speed commensurate with the extent of vision with the left front side twice the distance prescribed in natural conditions safe distance as it should be glass open the car as well as you should not use high light but uses a low-light, and you must use the machine alarm from time to time and must be adhered to walk in the middle of River Road and the use of lights to wait in the case of car crashes and drive out of the way and not completely out of it so as not to risk his life.

9. When sliding the car by water or any liquid on the road must lift the foot off the gas pedal in the case and the steering wheel in the same direction as the slide must raise the foot of the brakes on the car so as not to lose the car balance.

10. When you use the brakes so strongly you canceled the car router, so you must use the brakes intermittently so you can use the routers at the moment of lifting the foot off the brake.

11. When the sudden holidays of the car should be stopped far right of the road with lights running to wait and put a warning triangle behind the car a distance sufficient to avoid a collision with other vehicles.

12. In case of sudden braking holidays can use the hand brake as well as the brake motor (reverse parts).

13. If a short circuit occurred in your car tried to disconnect the battery.

14. If a fire occurs in your car and not have a fire extinguisher tried to put out the fire using sand or a large piece of cloth can be used fire extinguishers buses nearby public transport vehicles. If the fire got out of control must be removed from the car a distance of not less than 50 meters to the possibility

of fuel tank explosion.

15. Must calm the vehicle speed in curves and must not exceed the mid-line in any way and commitment Right side of the road, in the two-way roads.

16. Priority to vehicles that field, "Vertigo" and want to get out of it without the other vehicles that wish to enter into the field "Vertigo" as well as within the priority intersections for vehicles within the intersection.

17. In the case of a cross on the T-shaped, the priority to those who walk in the longitudinal way.

18. In the case of traffic at the intersection of the priority to those who deviates to the right without which veer left.

19. The driver of the car should not talk with passengers because it leads to the loss of focus while driving and then leads to an increased likelihood of accidents.

General Advice for vehicle drivers

On each vehicle commander must make several steps before his vehicle on the road even sure of readiness and preparedness of the vehicle to avoid a traffic accident occurred.

These steps begin before starting the vehicle and can be summarized as follows:

First, before driving

1. Adjust the side and front of the mirrors can see what's around the vehicle and left behind
2. Adjust the driver's seat for a comfortable driving position
3. Buckle

4. Ensuring that the road

5. Give a signal to move either to the right or to the left Second,

While driving the vehicle driver must abide by several rules, including:

1. Permanent commitment to speed limits, where speeding is one of the main causes of traffic accidents
2. Beware of road surprises and mistakes of others
3. Leave a safe distance between his vehicle and the vehicle in front of him so he can stop safely in the event of an interruption or any wrong move of the vehicle in front of him suddenly

4. Non sudden deviation to the right or to the left
5. To signal a move to the right or to the left to his successor at his notice drivers

6. Don't exceed the front vehicles from the right

7. Attention and caution drivers of bicycles and motorcycles on the road

8. Give priority to pedestrians in places pedestrian crossing

9. Attention and consideration of the side mirrors in the case of overtaking

10. Take appropriate decisions in the event of increased speed or change the direction of the lane to another

Third:

Driving in residential areas

Should the commander of the vehicle driving very cautiously in residential areas and for several reasons:

1. The presence of children and pedestrians in residential areas more than the external roads as well

as parking on the side of the internal roads and drivers Bikes

2. Commitment to reducing the maximum speed in residential areas

3. Attention for vehicles emerging from junction's residential areas and entrances to houses
4. Attention to the doors of parked cars might suddenly open to the descent of the passengers, including

5. Attention to pedestrians and children, especially when private gardens sites for children

Fourth:

The vehicle driver must give way in several places, including:

1. Places special pedestrian crossing which there is no signal light or when a passer-by had started walking to cut the road

2. When the vehicle out of the garage or the main road or attitudes

3. When you turn around to the left, the priority coming from the front of the vehicle

Congratulations

Vehicle noise reduces concentration and academic achievement of students

Use the horn near hospitals and schools traffic violation

Many studies have confirmed that amplify the voices of vehicles and high sound horn annoy drivers and acquire a nervous tension because of the loud voices which is reflected in their behavior and treat each one of them with the other, and this explains the conflicts that arise between them quickly and sometimes without logical reason.

The lead voice rising from the natural rate to a lack of vital activity and excitement, anxiety and lack of internal satisfaction and confusion and inconsistencies

Exposure to noise for a second one reduces the focus for 30 seconds... Studies show that school students who are exposed to noise intensity 50 to 60 dB, which leads to sense of the length of time of the study also consume more time in solving exercise while not appear in the quiet atmosphere (3037- dB)

And infect noise ear permanent headache and a decrease in hearing medium votes. When the stop noise needs of small vessels to (5 minutes) to return the first her, and that there is a direct effect of noise upon the arrival of the intensity of the top (50) dB, occurs shortage of Hearing at (80 dB) or higher...

Brigadier Engineer Hussain Ahmad Al Harthy Director of the Directorate of Traffic and Patrols at Abu Dhabi Police said the traffic law and federal traffic number (21) of 1995, as amended, prohibits the use of alarm near hospitals, schools, houses of worship in populated areas between the hours of ten pm until the time of sunrise devices and so what constitutes use of the nuisance of the students, including preventing them from attention to the study and collection, in addition to what is represented by the sound of the horn inconvenience to patients through the use of near hospitals

He said that the Article (131) of the Act provides for the use violation "horn in prohibited places" financial AED 200 fine and two points traffic, as provided for in Article (144) for violating the use of the "God be annoying alarm" a fine of AED 100 and two traffic,

Al Harthy Said Excessive use of horn uncivilized behavior, stressing the need not to be used except in cases of necessity, and not used nervously to alert others or forced to leave the way they cause the dispersion of attention for monitoring the road and confuse drivers causing the occurrence of traffic accidents

He urged drivers pursuant to the Base Command art and taste to maintain respect for the rights of others and not blasting them with bales

alarm, and called on football fans to no-hassle and show good manners and stay away from everything that offends the general atmosphere after football matches and to celebrate our victory in a civilized manner without the hassle

Al Harthy said that any action to modify the vehicle specifications to amplify their voices and installation of additional speakers by great powers to increase the voices emanating from them so that those cars become a source of inconvenience as a result of what comes out of their music sounds in order to draw attention and brag

She traffic statistics of the Directorate of Traffic and Patrols at Abu Dhabi Police for freeing about 100 contrary to the use of horn alarmingly during the ten months at the level of the Emirate of Abu Dhabi, including 18 in violation of its use in places banned and 82 contrary to the use of an unobtrusive, and book 4846 vehicle caused the noise as a result of providing amplifiers sound for a month and a fine of 900 dirhams during the same period.

Date of traffic lights from stonesTo light signals

Imagine that you are moving in the morning without street traffic signals ?! Can you walk safely in your city? Of course it will be a difficult thing! Perhaps you wondering what the people were doing in the past before the advent of traffic lights and what are the alternatives that they rely on them?! And when it was invented plates and traffic lights in the world and how it was formed in the beginning?

We wonder so much when we know that the Romans were the first invented signs that regulate traffic on the streets in the past and that was a big column of stones placed on the side of the road to illustrate traffic directions and remaining distance to the cities and villages, and They call on these stones Name "Miliris" It is believed that this word is the origin of the unit of measurement "mile" used today to measure distances.

During the middle Ages, in the period of the Century (515-) traffic signs developed dramatically and it has become common to find a private multi-directional traffic signs at intersections and were placed after every mile of mileage.

The invention of the first light signal "Cimafro" in Britain in 1868

Began using optical signals in the late nineteenth century, where due date using the first optical signal to December 10, 1868, it was the British Rail "John Beck Knight engineer" designed the first optical signal outside the British Parliament in London and this signal very similar to optical signals for rail at the time so it was containing arms moving averages, one red and one green was used to control the movement during the day while you are relying on the lights in the evening in motion, where red means stop, while green means allowing to pass and was working this reference gas . The aim of the installation to avoid collision horse-

drawn carriage to the exit ministers and members of the British Parliament, especially at night, where he was intense darkness and fog, these signals were built on a pillar of iron with a length of twenty-three feet. This signal was not automatically work but was controlled by a traffic policeman standing beside her all the time. This signal was disrupted after two years of installation and caused injury a traffic policeman, who was standing next to her .

The spread of traffic signals panels warning after the invention of bicycles and vehicles

At the end of the nineteenth century, after the invention of the bicycle, which formed a new threat to the safety of road users, the need for the need for a traffic signal on the side of the road appeared. Paintings warning and guidance on the slopes and higher plateaus have appeared; for being one of the most dangerous places at the time, and I took some of the local authorities to undertake the installation of traffic signs.

And the invention of motor vehicles in 1896 took the manufacturers compete to offer the new, and so I took these companies important installation of traffic signals. In the age of the vehicles, and specifically in 1903 appeared for the first time, paintings and anti-warning, which was symbolized by the color red triangle to the top of his head and prove to the intersections and steep cliffs and dangerous turns.

In the thirties of the last century was the installation of signs and traffic signals task is still assigned to the manufacturers of vehicles, and in 1931 it was stated that the traffic signal system is no longer achieve traffic safety in light of prosperity vehicle industry shoved the formation of a public committee to monitor the system, and as a result emerged in 1913 new traffic signals where this Committee formed a general basis for the current system of traffic signs and signals until the year 1960.

Land lines

Regarding lines ground dates back to the year 1843, where she was white stones stacked in the form of a straight line, as well as lamps form the dividing line between the roads at the time, while began interval white line appearance between the roads during the

First World War, where began to be used commonly spreads since 1920 .

The first electronic device to organize traffic, Ohio, 1914

In (1914), making the city of Cleveland, Ohio, was the first electronic device to regulate traffic using green and red light added to give a special tool humming sound when the light changed.

It was installed one of the streets of this city. And used as well as the first automatic traffic signals US city of Detroit, and in this way can the color of the traffic lights to change automatically every few seconds or minutes, depending on traffic density on the roads. Then came the modern traffic signals in London in (1926), was installed the first signs of the passage in the city of Paris (1923).

The funniest signals traffic lights in the US city of Los Angeles where illuminating and turns off in turn accompanied by bell ringing regularly with a hand mechanical waving for drivers to pay attention so as not to overcome them sleepy when driving their cars.

Thus became the traffic lights an important and necessary part in the traffic on the roads clogged in minimizing traffic accidents dramatically and a pedestrian crossing in their own places and traffic safely.

In 1926 was created the first Ministry of Transport specializes in signs and traffic signals, has developed several controls to use the white lines on the roads. In the thirties of the last decade has been the use of white lines on a large scale, as they have become determine where to stand then like cornering and sharp angles, as they have become to help the police and the optical signals in traffic flow control and serve as a warning to road users of any obstacles may encounter. In 1944 began to use the white lines on a large scale as it became identify tracks on the main streets and at the entrances to roads and clarify the eligibility of traffic at intersections with the help Whoa signal. And successful experiences in the field of Land lines emergence of the use of white lines to control the overtaking zones, where used two white lines on straightening one to indicate the areas where there may be overtaking, and that was in 1957, has

continued to use that proved effective in May 1959, and proceeded used by everyone having gained legal legitimacy.

Cat's eyes

Was beginning to think about the invention of the eyes of cats due to the accident suffered by a British agent named "Percy Shaw," and who was driving his vehicle to Bradford and struggling to be avoided at the last minute to fall into the cliff, while reflected vehicle's lights in the eyes of a cat who had been sitting on the wall to by the way, which his death, that the eyes of cats reflect part of the spotlight on them, cats have what looks like a mirror behind her eyes, a lens and mirror mirrored back the spotlight it to its source, these small information that the accident tonight pushed by Shaw to invent a new form in the rationalization of roads, convex lenses on the back of the mirror in an upgraded aluminum pad, rubber and planted within the railing on the way template.

As cats eyes of the lens and mirror fixed in way reflect hanging out light from the next auto lamps and want him to the driver, and in 1935, established the first factory for the production of Night nails or "Cat Eyes" and the spread of this innovation in the world and Raj during World War II when the need arises used in airports.

What happens on the traffic light stop?

Although the optical signals to save more than 11,000 annually spirit, but they cause a lot of confusion in the event of a break up (or down sometimes). In these

cases, the intersections become a regular intersections where traffic priority for the cars on your right. Some areas of law is somewhat different, in some countries placed bottom plate each signal to clarify laws in the case of stop signal, and in other countries should wait for the arrival of man to control the passage of the road (or cornering in turn allowed him) direction.

Some countries stop light signals during the night, the light blinks of Orange alone and that means attention during cutting intersection, in the case of the red light flash, it means the need to stop completely before cutting the intersection.

The unification of traffic signals globally

After World War II loud corridors of the United Nations that there should be standardized and internationally recognized traffic lights. They own traffic signs global standards stipulates that the red color at the top of the signal, after the color orange and green at the bottom. As if the optical signal accidentally installing the colors order varies according to the traffic base shall be red lighting on the left of the states that allow passing on the right, and being in the right in the states that allow passing to the left.

In traffic studying to Directorate of Traffic and Patrols in Abu Dhabi concern over the phone and the possibility of accidents three times

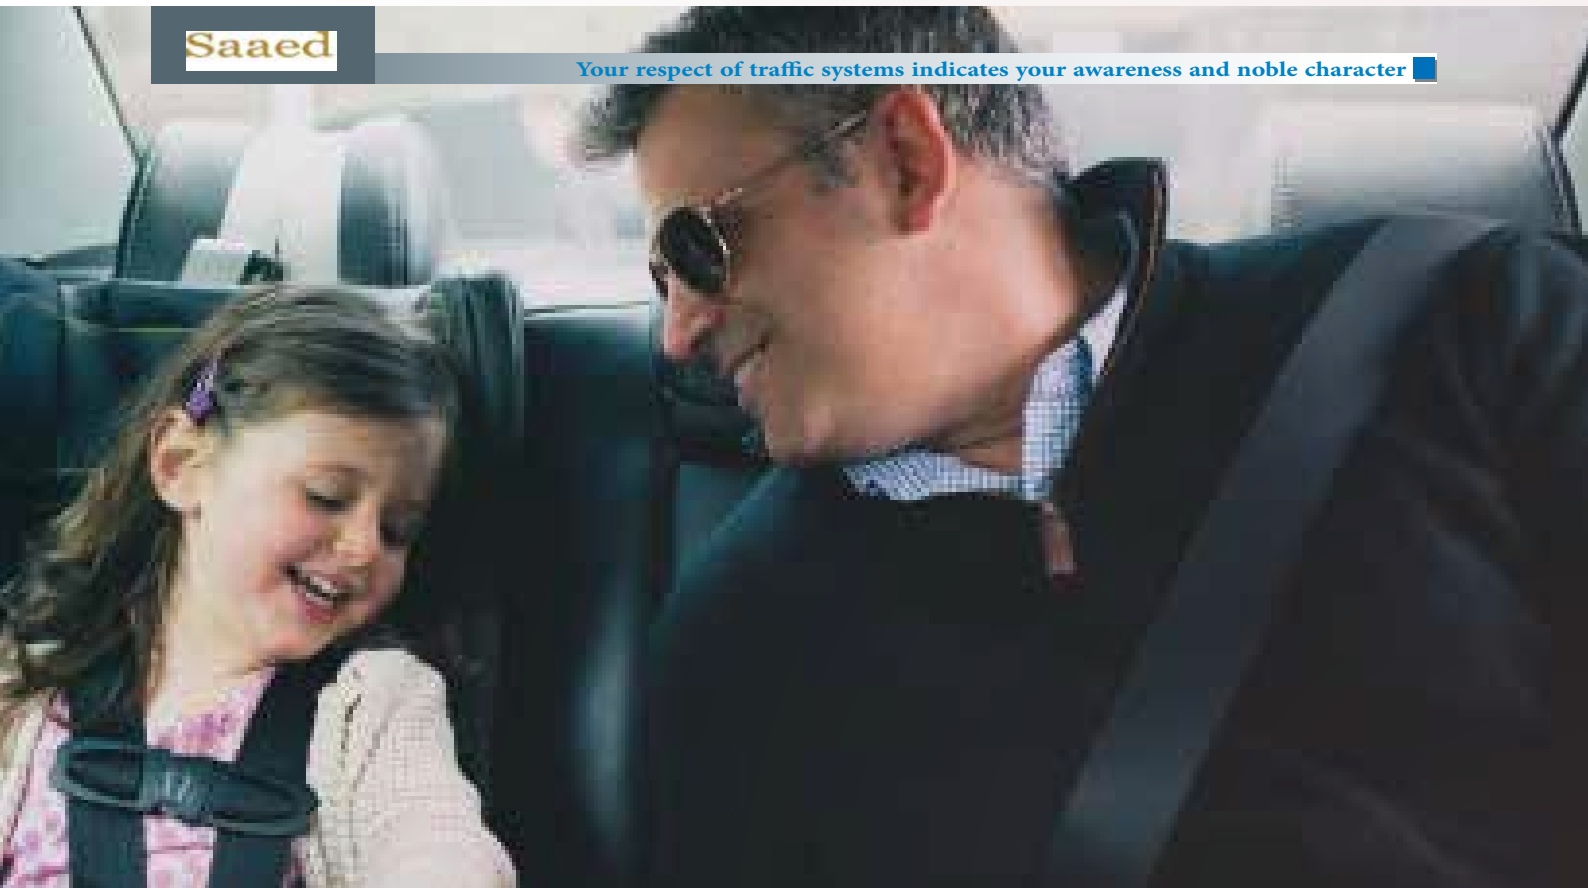

A traffic study of the Directorate of Traffic and Patrols at Abu Dhabi Police confirmed titled "The Impact of using a mobile phone and electronic devices on the safety levels of traffic" dangerous preoccupation phone mobile while driving and its effect on the driver's ability to turn properly and confirmed that he does not have a no significant difference between the use of mobile phone by hand or and speakers and that the use of mobile phone while driving increases the workload on the brain functions mental as it affects the psychological driver and increase the tension and anger and the number of times forgotten corners

It warned that the traffic study of users of mobile phone while driving are more likely to crash a car or an object or a human being as well as they are exposed to a rear impact and increase the likelihood of causing an estimated 3 times the motorists who are under the influence of intoxicants traffic accidents. And the deviation of the vehicle from the track is increased by 280% in the case of sending text messages

The study, conducted by the Directorate to about 63% of those who use the mobile phone while driving are citizens of the United Arab Emirates. 64% of mobile phone users while driving from the age group (1830- years) and is the category with the highest rates of traffic accidents. 92% of drivers are well aware of the risk arising from the use of mobile

phone while driving, which in turn up to cause traffic accidents 31% of drivers admitted that they had been subjected to traffic accidents resulting from the use of mobile phone while driving. More than 90% of the participants in the survey sample indicated that the use of mobile phone while driving behind committing traffic violations on the road. 43% out of 53% of those who own the device (Blackberry) using the program (Blackberry Messenger Chat) driving their vehicles.

The study recommended a joint study with the TRA to develop solutions and mechanisms to limit the phenomenon of using a mobile phone while driving because of the seriousness used as study the development of the investigation of incidents of serious and linked data Etisalat and du to make sure the practices clarified whether the driver caused the accident has been used mobile phone while driving. Interest in the development and activation of an integrated system to raise awareness of the dangers of using a mobile phone while driving through different awareness with emphasis on the importance of measuring effectiveness. Study modification for using mobile phone while driving offenses include violation of the terms of the use of hand-held or headset where the study showed that the use of the speaker is no less dangerous for use by hand, with an emphasis on educating road users about the amendment, if approved, in a proactive manner.

Your way safely but..... in conditions

No longer owning a car thing of luxury but a necessity of life cannot be dispensed with, and require a first driving more vigilance and poise and the ability to fast and secure to move at the same time of year and so advise motorists to drive at a constant velocity and quiet even practicing on the driving under all situations and circumstances different.

With the mastery of leadership skill you well to identify the requirements for the proper handling of your car and the actions that must be taken into account before and during driving, as well as security measures that must be taken after the car stopped and here are some of these instructions.

Detection procedures on the car before the start of the trip and during

1. You must check the status of the front wheels before moving.
2. Something must be done first examination of the

car before moving out to ensure there is no damage or causing an accident while driving.

3. You must work to switch tires every 7,500 km.

4. You must make sure the water level in the water cooler is completed before moving. 5. Be sure to move the vehicle before it has been closing the doors well before the move.

6. be sure to connect the wheel bolts are all well before the move.

7. You should not walk out of the vehicle and some screws missing wheels installed.

8. Be sure to adjust the headlamps so as not to cause temporary blindness to the eyes of others or does not lead to the reduction of the efficiency of vision during night driving.

9. Must be set right mirrors tilt to the right and you sit in a chair the steering wheel so that it is to look ahead and adjust the mirror of this situation so that

you see the lowest possible part of the right side of the car from this situation.

10. Brakes should be tested before moving to trip on the highway or driving for long periods.

11. When the brake test must make sure that there is no wheel stopped by another wheel or the car veer left or right when you press the brake or brakes that stop once without calm

12. be sure to know where all the control tools in the vehicle before moving out as well as you can adjust the set during the stop.

13. Must test all the lights before the vehicle to move, especially the front brake lamps and lights and emergency flasher lights.

14. You should not put pressure on the brake violently is early damage the brake system as it displays your vehicle rear collision.

15 must wear a seat belt so that intersects with the shoulder, not the neck and can help make that happen cushiony down the driver or passengers.

16. Children should not ride without the age of ten the front seats of cars.

17. The safety belt must be worn during tight and not soft.

18 must wear a seat belt even at slow speeds.

19. If the frame burst or deflate the air must be non-stop in order to maintain the framework, better still choose a safe place to stop and change the frame.

20. Shall put warning signs, according to road speed and the status of the risk so as to achieve the greatest warning and be 100: 500 feet from the place of emergency stop.

21 If a malfunction occurs the vehicle has not been able to stand in a safe place, the first thing to do is to give up the car from the passenger side and then take the safe away from the road with the use of badge or a piece of clothing to warn pedestrians of the car when put to the presence of assistance.

22 should be seen in the mirror at frequent intervals to understand what is going on behind your car once every 10 seconds approx.

23 must be considered to counters at intervals

24 should not raise the voice of the radio cassette or

higher than the sound of the engine so you can drive as well as a sense of the sounds of alarm or warnings from outside the vehicle machines.

25 should not rely on mirrors when you want to change the direction or rotation or deviation to the right or the left or the reverse, but should always be considered over the shoulder to check blind spots.

26 must be prepared in advance of the process of rotation to the right or left by the rotation that you enter into a warm near the road or who intend to enter it in the intersection.

27 should not be given to the right or left signal only after making sure that there is no other way by the way you intend to enter into it.

28. If you want to stop or calm during high traffic speeds and to inform car rear so it must light pressure on the brake intermittent manner to give a red light intermittently from behind to alert the rear cars.

29 when Skip "overtaking" must take into account the lack of a traffic sign or prevent Skip case according to the rules and etiquette of traffic.

30 when Skip should be used during the day or inverter alarm light at night to inform the driver about your intention to skip machine.

31. If there was a car intend Taktik DO NOT referring to the driver behind you to encourage him to skip whether manual or light, but you just have to calm the speed and commitment to the right side.

32. When making process Skip For vehicle not to return to the original lane commander, but after seeing the front of the car lanterns Skipped in the windowsill.

33 in the event of a fire extinguisher into account not only the engine after the car stopped in a safe place.

34 shall not open engine bonnet when the fire if possible and search for any slot to direct the fire extinguisher of which (such as the front grille).

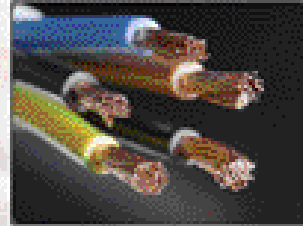

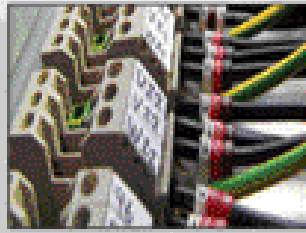

35 shall not fire the motor area with water and can be replaced with sand or a fire extinguisher blanket.

36 should not open the radiator cap during high temperature.

37 must abstain from alcohol and painkillers, particularly for allergies affecting the vision, and the reaction time and the perception of drugs.

Saaed Association sponsor the creative initiatives Honored film Saaed Association Honored the team of traffic education for the film «Driving is Art and Courtesy» That has been watched by more than 93 thousand people

Brigadier Engineer Hussain Ahmad Al Harthy Director of the Directorate of Traffic and Patrols at Abu Dhabi Police, chairman of Saaed Association Honored action film "Driving art and taste," which has been the number of views on social networking sites "YouTube and Facebook" team reached more than 93 000 views

Al Harthy praised initiative creative youth citizens who bistro that community to contribute to the promotion of traffic culture including hurt in the consolidation of traffic awareness and provide virtual scenes behaviors of road users while driving and invited them because the honor motivate them to make more creative awareness of traffic business ceremony was attended by Colonel Khalifa Al Khaili Director traffic engineering and road safety management and Colonel Hamad bin Mubarak bin Athaith Al Ameri, Director of capital Traffic Directorate

Al Harthy including enjoyed by film clips of virtual errors committed by drivers and urged them to abide by the law of Traffic and do not commit offenses to lead to traffic accidents, stressing care Assembly for owners of creative ideas in the field of traffic safety

Al Harthy vision Assembly to encourage all segments of society to participate in the employment data and modern technology such as social networking sites and other media in raising the level of traffic culture by providing traffic tips and prepare movies awareness or contribute creative ideas in the field of spreading traffic culture in the community

For their part, the young team of citizens expressed their appreciation for the initiative of the Association Honored stressing that honor will motivate them to make more films and creative ideas in the field of traffic safety.

Rules and Literature traffic

Each user on the road to take into account in its course to make maximum care and caution and reserve required, and does not lead to damage his behavior to others or compromised, or result in the obstruction of others or harass him any more than required by the circumstances do not allow avoiding.

To leave or take what would be prohibited hampers traffic on the road or cause a danger to users Kaloterbh and stones, building materials and others.

The commander of the vehicle driven by the disclosure of her and all its organs and ensure safety and suitability to walk without the risk of it or the emergence of the risk of them on others.

The commander of the vehicle and riding next to him during the course of using a seat belt is committed.

Motorcycle user committed during the walk to wear protective head cover.

The commander of the vehicle shall not use your mobile phone while walking manually.

The commander of the vehicle responsible for the existence of what hinders his vision because of sitting one in the vehicle or because of its cargo or condition (stickers or posters or others), as well as undertake not to sit children until the age of seven years in the front seats of the vehicle, and therefore that all the lights are necessary presence in the vehicle actually exist and that always be valid for use.

If taken place during the course of vehicle defects that would affect the security of the traffic and

liquidity For the pilot that have been withdrawn from the traffic of the shortest side road as soon as possible.

On motorists and other road users Afassaha for the passage of emergency vehicles approved (Kalatfa and ambulance, civil defense and police) as they move destined to do to serve the urgent emergency.

May not be placed or the use of optical or acoustic alarm devices that are restricted for use on emergency vehicles or convergence in the sound or the degree of light in the other vehicles.

Do not use alarm devices, except in case of necessity to alert road users to the approaching vehicle or to the nascent about risk or danger threatened and may not give an acoustic signals in a way annoy pedestrians or worry comfort of the public may not be the voice multi-tones or to issue melodies or Osota alarm Others are not consistent with the purpose of the alarm devices,

and not to exceed the intensity of the sound of the machines allowed in the vehicle alarm about the limits laid down in the regulations

Use audio alarm devices on an ongoing basis or for the purpose of the alarm are or if it is not justification for use of the security of the road traffic are prohibited.

It also prohibits particular use in the following cases:

Near hospitals or schools

In populated areas from midnight until six in the morning

While parking the vehicle

At times specified by the competent authorities and the Department of traffic that.

Vehicles may not be used in any private or processions in any gatherings.

May not be any writing, drawing or any other data other than those due develop the rule of law and regulations on the body of the vehicle or any part of their parts.

On road users Afassaha for the passage of official parades and the like as soon as the announcement approached by acoustic stimuli or even optical summoned to stop it and then should the far right of way commitment.

May not be racing public roads without a license from the governor or governors and after providing the necessary guarantees to compensate for what it may give rise to damage whatsoever.

To motorists of all kinds stand immediately whenever the traffic police asked them to do so.

* Command and the use of vehicles

Must have for every moving vehicle commander assume leadership if it is towed by another vehicle.

Do not be left to the rapid transport vehicles on the road without its leader for any reason until after the sealed doors and take the necessary measures to

prevent accidents arising from the left and to prevent the left leads to the obstruction of traffic.

Must use the vehicle to avoid all fuss or inconvenience.

Required each of the vehicle enters or descend them to observe that this does not endanger other road users at risk.

Shall not leave the vehicle engine running unnecessarily.

May not be driving the vehicle within cities in the same sector of the road back and forth without special justification, if that other nuisance

* Traffic Rules

The commander of the vehicle that needs to be far right side of the road while walking and particularly in the following cases:

If the actual speed of the vehicle functioning well below the limit set for the speed in this way.

When visibility on the road in front of him is Cafe

In the case of an interview the other vehicle coming off the opposite direction.

In the case to allow for subsequent vehicles him to skip his vehicle.

If the River Road or one dedicated to traffic parts in one direction is divided into several tracks intermittent longitudinal stripes For the commander of the vehicle to walk in the path that holds and may not be for him to change course only after making sure that it

does not pose a danger to others or to traffic, after alerting others from road users to it in a timely manner and using optical and signal alarm function on the deviation signal.

If River Road a two-way divided into two lanes separated by longitudinal solid lines are prohibited to walk on these lines or exceeded.

If River Road a two-way and is divided into three tracks to the commander of the vehicle may be used East track after to make sure it is free of traffic contrast and subsequent vehicle accelerated and that it does not pose a danger to others or to traffic In all cases, may not use the track, located in the far left dedicated to the opposite direction.

If River Road a two-way and is divided into four tracks or more over the previous facial Jazz to the commander of the vehicle using the nearest tracks the internal tracks from the opposite direction relative to its direction after to make sure that this does not pose a danger to others or to traffic in all cases not to the commander of the vehicle may be a change of course only after the uncertainty of not exposing others to danger, and after the announcement of his desire to be clearly and in a timely manner with the use of a detour signs.

Who wants to take a detour that vehicles leaving the interview with him first and hedge particularly for pedestrians and if necessary to stop them?

Who wants to take a detour to the left to leave the corresponding compounds which direction you want to go without the right was blocked

At the ready to get out of his vehicle to the road or property from another part of the way to or from somewhere Nehr stop or wait on the side of the road to start down the road or not to enter into Nehr after to make sure Amkana without exposing others to danger.

If the driver wishes to refer to the back may not be done only when necessary and provided they do not

Give a Way

impede traffic and after.

If the driver wishes to refer to the back may not be done only when necessary and provided they do not impede traffic and after giving the appropriate signal and make sure it is absent from the road and not be exposed to road users at risk and not to exceed the reverse distance equivalent to the length of the vehicle.

*** Distances safety**

On the vehicle commander to leave between him and the vehicle in front of a distance sufficient to enable him to stop the vehicle when the lower-end speed or suddenly stop and he has to pay attention to the signals of its leader.

On the vehicle commander of the front brake suddenly not use undue force.

On a slow-speed vehicles and other vehicles that exceed the length of seven meters to be left between them and the previous vehicle has sufficient dimension can be a vehicle bypassed to intervene in that distance this shall not apply if they are the same deviated to start Skip announced it or if the direction of the traffic is divided into more of the path, as well as in the parts where prohibited Skip.

The commander of all vehicles going in one group are linked to leave between each vehicle of their vehicles and other far enough not less than thirty meters so

that the fastest vehicles, including when an operation Skip to resort to these distances to avoid accidents

* Facing vehicles

Each commander vehicle when matched his vehicle into another vehicle coming off the opposite direction to approach as much as possible from the right edge in the direction of the traffic being followed so that leaves the sides sufficient distance vacant on his left, and if not possible to leave this distance because of a heel or other users of the road, he must slow down and even stop if necessary until the passage of the road users of interviewers in the opposite direction

In ways that accompanies the juxtaposition where Okhtorh difficulty as the sloping roads occurs. You on the vehicle commander in the slope direction to go as close as possible to the right edge of the direction of traffic for him or stops completely to allow the rising of the vehicle to pass without difficulty. If the vehicle is upside exists from a broad cross section of the road is used or could be used temporarily as a stop on the pilot must stop in this place to allow the passage of the vehicle sloping.

* Skip

Skip from left to be always and may not be only to those who can clear vision and full after confirmation of the absence of any obstacle or the seriousness of the anti skip traffic during the process until completion

Each commander vehicle before making Skip the following in mind the process:

The absence of any vehicle commander followed began to skip it or gave a warning stating his desire to Skip.

The vehicle commander who led by the same trajectory did not give him a warning stating his desire to Skip

To be the way that the path is about to route of clear vision quite so traffic does not hinder the other hand, from the opposite direction or exposing it to the risk of taking into account the difference between the speed of his vehicle during the Skip and speed of road users who are trying Taktém.

Declaration desire to Skip clearly in a timely manner and to alert road users to be Taktém using alarm

signals and make sure they have responded to this alert.

Skip to stay away during all road users who bypassed so that leaves him and including a sufficient distance, especially from the side profile

On the vehicle commander Once completed Skip process that regulates itself in traffic to return to the right progressively and as soon as possible with no harassment vehicle Skipped then need to be far right side of the River Road without interference road users and has an exception to stay in the same path that operated during Skip process If forced to overtake another vehicle, provided that does not cause any harassment or inconvenience to drivers and subsequent vehicles him.

On the vehicle commander who overtakes another vehicle with its commitment to calm the speed as much as possible on the far right side of the path being followed by even allows the vehicle to overtake Skip complete the process and refrain during the Skip and even increase the speed of completion.

The commander of any vehicle slower than the vehicle Almtaktih have either nature or the existence of a maximum speed to slow down the speed in the right place, but that depends if necessary if necessary to enable several vehicles recites some directly from insurmountable.

If the driver announced his intention in the direction to the left and enrolled in traffic after entering in actually left, but the Jazz missed from the right.

Be exceeded march vehicles on rail lines from her right hand, but on whether the far right of River Road can be overridden from its left after the passage of the corresponding hedge If the traffic in one direction until the march of vehicles on the railways may be skipped from the left.

On the vehicle commander should not skip in the process of conditions and the following places.

If visibility around him is not enough.

If the case of the vision is clear.

If the advanced vehicle moving quickly made it impossible to complete the process or the Skip is the same skip another vehicle or there was a vehicle followed want to overtake.

If the opposite direction of traffic is not allowed to complete the entire process Skip safely each limbs and road users.

At intersections and on rail lines and bridges and in tunnels.

In the case of several vehicles stopped because of a signal due to breakup or blocking traffic.

In curves and turns and elevations and slopes and slippery roads and the intersection of roads, fields and near the pedestrian crossing corridors.

In specific longitudinal stripes traffic paths separating them may not walk on these lines or overcome.

In places where the outlawed under Skip signs or traffic lights or in accordance with the instructions of the traffic.

May not be for public transport vehicles and passenger transport vehicles to exceed each other within cities and may not be beyond each other outside of the cities, but if it does not lead to the obstruction of the road traffic.

*** Speed on different ways**

Keep in mind that the maximum speed of rapid transit vehicles on the roads when the availability of appropriate conditions on the face follows:

However allows the tractor to walk a minimum of 10 kilometers per hour on to commit far right side of River Road.

On the vehicle commander to reduce the speed of his vehicle pass him at populated areas or when entering into turns or curves or slopes or intersections or when approaching a pedestrian crossing places or when meeting animals or overcome.

The commander of any vehicle intended to slow down or speed calming largely to make sure before doing so it will not arise from the spool any risk or impairing subsequent compounds that followed.

May not be any leader vehicle that uses brake suddenly to ease the speed of his vehicle or to stop if there is no password required for security reasons

*** Intersections and traffic priorities**

The commander of the next vehicle from a side road and ready to enter on a main road or path is paved to enter into a paved road that stands up to first allow

the passage of vehicles on this road does not begin to enter only after his certainty of not exposing it to the risk of traffic.

Be a priority at traffic intersections where traffic is structured by man or by traffic signals or traffic signs on the face following:

For vehicles actually entered the intersection.

Vehicles coming from the main road intersects the road sub.

Vehicles coming from the right of any kind for any other vehicle at the intersection and the equally important ways.

Is committed to taking into account the priority of the other traffic has to slow down the pace for the benefit of his willingness to stop when necessary Ajoslh not continue unless he is able to walk and that after the uncertainty of the vision and make sure that his priority traffic will not endanger or be hampered significantly.

At a traffic stop or slowing, threatening Bartbake must be on the vehicle commander priority despite his vehicle to pass or if the signal light green or there are no signs or allow him to pass a sign not to enter the intersection if when you access it will stop it.

On each of his according to the traffic rules continue to walk right or priority to give them up if required by the traffic situation.

*** Stop and wait**

May not be the vehicle stopped in the parking lots, but when entering into or out of the vehicle or the vehicle to load or discharge and in other times and places where you have to stop expressly forbidden

You must process the vehicle stops conducted gradually do not result in any harassment to traffic after giving the signal function on it, whether photolithography or hand on each commander to put his vehicle as close as possible to the right edge of River Road and parallel to him what the region did not allow permitted Pending where otherwise that

May stop or wait near the left edge when the right side forbidden by Almrro to the presence of railway lines as well as signs of when to stop or wait in the road with one direction allowed it to wait on the left

side and forbidden on the right side may also stop or wait in the middle of River Road In some specific places signs indicate that

You must be a stop or wait for vehicles outside the cities and in non-populated areas in the far right of the River Road in the direction of traffic while avoiding devoted to the conduct of cycling dedicated to passing pedestrians and places the road sections

May not be in any way to stop the vehicle on after at least five meters away from the intersections entries and fields and places of pedestrian crossing stations and public transport vehicles and level crossings

Be waiting vehicles in designated areas and toward a row regular traffic

Shall not stop or wait in the following places

Allocated to the pedestrian crossing and on pavements and pathways for bicycles and places at level crossings

Tapes on the tram or rail or next if it impedes the functioning

On bridges or overhead walkways or in tunnels or under bridges unless there is a custom to stop or parking spaces

On River Road in the highlands or the slopes or bends or curves, as well as near vision when they are not sufficient to ensure skip the vehicle safely, taking into account the speed of vehicles on this part of the road

On River Road near the ground longitudinal related marks which are not allowed to be exceeded when the occasional space between the vehicles is parked and the longitudinal marks less than three meters

In places that may obscure vehicles awaited breakup or where traffic signals or traffic signs from the view of the rest of the road users

In front of the entrances or exits of garages vehicles or petrol stations, hospitals or aid stations or firefighters or police or military areas or entrances or public or places of worship, schools, parks exits.

In places that impedes the movement stand another vehicle parked

On River Road next to another vehicle parked

In unauthorized places where you wait in accordance with the instructions of the traffic and the vehicle commander should slow down or stop if necessary to allow for the transport of students to cars to make the moves necessary for boarding or disembarking

Prohibits pilots one of the vehicles taxi waiting in his vehicle is standing places (positions) determined by the competent department password that

It also prohibits him walk around his vehicle to search for a passenger is assigned to him in situations However, he may stop as opposed to the far right of way for the acceptance or passengers disembarked.
