## Martyr's Day .. finest examples of sacrifice and redemption

We celebrate the 30th of November each year Martyr Day, in honor of loyalty and recognition of the sacrifices and tender and make martyrs of the great homeland, this day, which is a tribute to the men loyal carried their lives in their hands and have done everything by own in order that the flag of the UAE remain elevated and mortal, not afraid of death or injury but they made it all medals and decorations studded history record of trophies and memories. Each of them immortal martyr legend .. some of them fought until the last drop of his blood, and some of them clung situated Despite injury, and some of them fought until he died embracing his upon.

There is no doubt that they beat us in the finest examples of sacrifice and redemption, and gave their lives in order to live in the UAE and its people's security, stability and prosperity and happiness. All of them were waiting for testimony, to their knowledge as a higher degree of redemption and sacrifice.

Since the beginning of the coalition and our martyrs and our brave fighters are aware of the important value and they know it will not be easy and without sacrifice, though, so everyone was racing to a certificate, to devote through that sacrifice value for the homeland with honour and affirm that it is not life, but with the nation's unity, security, safety and stability. And martyrdom for the sake of that goal and its associated values and principles are the origin of life. The home of the brave martyrs are today at the mercy of God and in the records are spotless history, having raised the nation's flag high above the clouds and performed the Secretariat and in all nesty they are the bulwark which further danger for our state and region and our nation, you will not forget them as long as we live.

# Phone use while driving

Use of mobile phone while driving the vehicle the occurrence of serious accidents , may result in fatalities and serious injuries , which is not insignificant what constitutes a risk of fatal affect the lives of the driver and others, despite warnings from police repeated for drivers not to use the phone while driving their vehicles to avoid accidents, compared to tighten control , and awareness - raising campaigns to introduce them to the cons and the seriousness of their lives and others.

According to the studies show that the likelihood of a traffic accident more than four times the driver is talking to the phone, where it contributes to loss of control of driving the vehicle , since the use of the phone behind the wheel distract attention from the road, and slow to respond to the surprises the way, and do not leave enough distance between your vehicle and the other in front of you and the difficulty of the survival of the vehicle in one lane , and sometimes exceeded the red light signal . And increase it has proven studies that use the phone while driving a vehicle is equivalent to driving under the influence of liquor and alcohol, what constitutes a great danger to public safety, we must be aware of all the drivers to be more committed to the laws and regulations to walk, especially not to use the phone , which entail significant risks, because accidents that are caused by this act , and lead to loss of life, injuries suffered by the driver and others. That it requires careful and take this into account while driving a vehicle in order to

maintain our integrity, and must be on every driver in the event of receiving a call or message over the phone while driving stand in the space, talk to Phone or reply to the message received, within a short period very time, or to postpone the restitution process, while access to the place of destination, to avoid accidents and endanger his life and others at risk. He is the use of hand phone while driving a vehicle hearing , the more risk when you use the sense of touch and looking at the phone while writing the message, which leads to dispersion in the attention, and occupancy senses of look and touch for a few minutes in a manner contrary to the rules of safe driving « constipation steering wheel with both hands » We invite everyone to cooperation and teamwork to address the phenomenon of using a mobile phone while driving in order to preserve public safety , through expanding the awareness and recognition to the dangers of this phenomenon, and compliance with the laws and regulations of traffic.

# Awareness our children, traffic guidance and ways of prevention of accidents

I've become traffic accidents and resulting deaths and injuries seriously impede their owners are the biggest concern for community groups,

Since people usually move from one place to another, either on foot or using bicycles or cars, but this means different risks, it should be known to all, especially children ... and here it must be trained to avoid actions and behaviors that result in such painful incidents.

And accidents for pedestrians and motorists often concentrated their causes on the large numbers of cars, poor knowledge of the infantry to the instructions that must be followed for their safety, as well as lack of knowledge of motorists behavior of pedestrians, and speeding cars set by the traffic system which drivers, and not to follow drivers and pedestrians for traffic signals ... and other irregularities.

**And clear awareness regarding the following areas:**

## **First: the prevention of traffic accidents:**

Children are exposed to many dangers in the streets, which result in falls and fractures and wounds; which may leave marks may be reflected in the child's physical or sensory disability. And therefore must take appropriate measures to protect them from it, which include:

1. A child should learn that the highway is not a place for play and recreation, and there are places dedicated to it.
2. Accustom to respect traffic rules and work out, do not pass by the street to see a green light with the followers of the traffic cop instructions and respect guidance.
3. Train the child to look in both directions before cutting the road, with attention to the car when cornering and transit from the pedestrian places.

4. The child must learn to hold the hands of an adult when crossing the road to avoid accidents due to the surge in traffic.

5. Should not lag while crossing the street and to refrain from reading while walking in the streets.

6. Must be alert to children using pedestrian bridges at the crossing to the opposite way, and to refrain from walking over the bridges of cars they are not for pedestrians.

7. The child learns to walk on the sidewalk only, and not to go down with him, except in the case of crossing the road.

8. It must be emphasized always the child before crossing to the next car driver sees him no matter how far away, so that when you cross the road can - Child - suddenly stopping and quickly when it wants to; while the driver of the car does not have this

## **Estimated especially if hustling.**

9. Do not let the children take to the streets on their own, without control for any reason (whether to play or to buy house requirements).

10. Not to allow children to play in the street, especially in places where the conduct of the cars.

## **Second: the prevention of car accidents:**

Should provide protection for children when riding a car, whether it was during or accompany him to his parents while riding a bus to school, many of the accidents when they occur leading to serious damage to those inside the car, especially children, which may cause injury to the child The his wound or disability.

Should provide protection for children when riding a car, whether it was during or accompany him to his parents while riding a bus to school, many of the accidents when they occur leading to serious damage

to those inside the car, especially children, which may cause injury to the child. The his wound or disability.

And the procedure that must be followed to protect the child as follows:

1. You must use the seat belt for children. It reduces accidents, injuries, and the baby chair in the back seat was necessary to protect the child in the event of a collision or sudden stop, and must not be allowed to leave the children standing on the rear seats or in the roads of school buses.

2. During the course of the car should be sure to close the doors, glass and do not let the kids open them and not leave them to rear their heads or hands out of the car.

3. Children should sit in their designated places in the school before the cars went.

4. It is necessary in the event of a rear door to the school car to escape in case of emergency; alarm on children not to tamper with or open it or get off of it only when necessary or under the supervision of the driver.

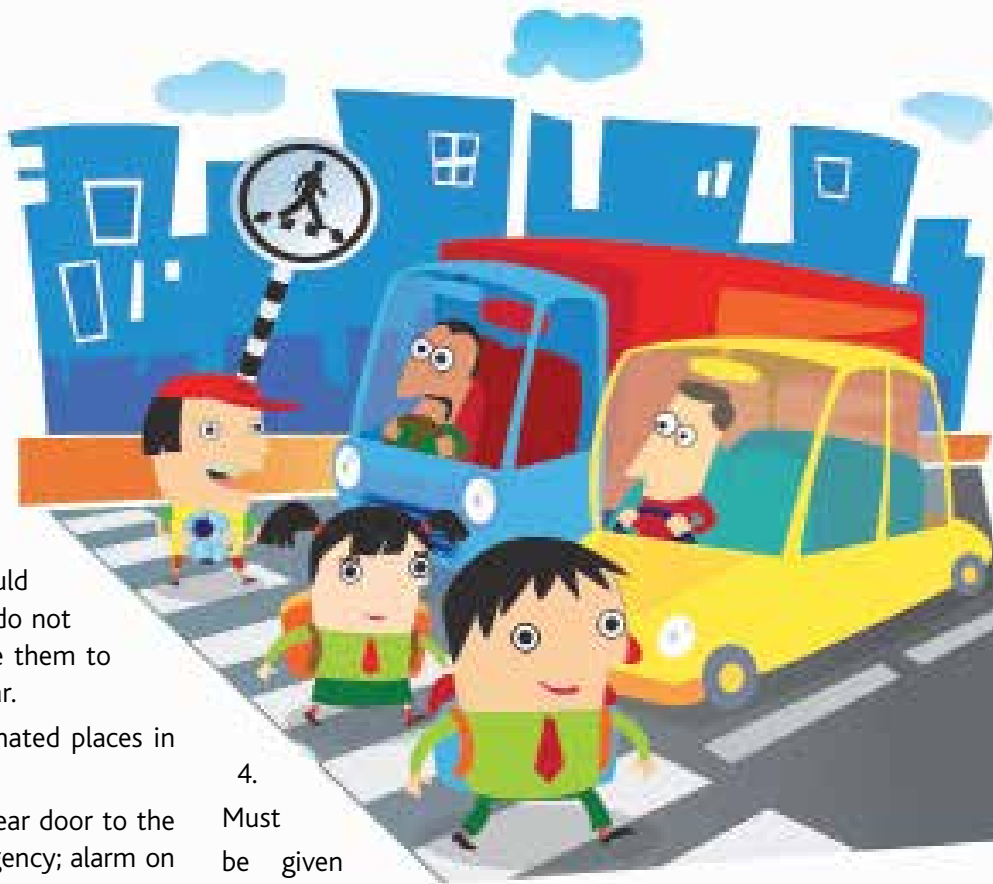

5. Do not allow children to board or disembark from the windows of the school car, and do not throw things, including on the road.

If the previous tips concerning the child should be on the driver (parent or driver of the school bus ... and others) should also take measures that would protect the lives of him in the car, and by following the security and traffic safety rules, which include the following:

1. Vigilance and not straying when driving, and to refrain from driving in the case of fatigue or illness or mental disorder.

2. commitment not to take sedatives or stimulants, and no drugs or drugs that have an impact. Sandman when driving; because they lose their driver's awareness of the risks and surprises road.

3. You must take into account the driver of the distance enough between him and the car in front so as to avoid accidents when needed sudden stop.

4. Must be given to using mediums such as fire safety drive, the Triangle phosphoric extinguisher, which is placed behind the car at the breakdown.

5. should the driver calm traffic when approaching a pedestrian crossing places or when entering the fields; to ensure the safety of the road, and the road is orthogonal. The priority of the traffic coming from the main road.

6. You must run the rain areas in the event of rain to get a clear vision and must walk slowly and carefully and not wasteful use of the brakes in the event of a lack of vision, and must be adhered to the right side of the road and use of small lights until next enable the forward or backward to see the car.

7. Before you open the car door and get off of them must make sure that it is absent from the road, preferably the descent of a passenger car from the right.

## Getting Your Vehicle Ready for winter

# Car Care Tips

**It's foolhardy to head out in a poorly maintained vehicle in the dead of winter, of course, even vehicle owners in temperate zones need a car care**

\* "Regular, routine maintenance can help improve your gasoline mileage, reduce pollution, and catch minor problems before they become big headaches," \* these car care tips to give you peace of mind during fall and winter driving:

\* Before you do anything else, read your owner's manual and follow the manufacturer's recommended service schedules.

\* Get engine performance and drive ability problems — hard starts, rough idling, stalling, diminished power, etc. Cold weather makes existing problems worse.

\* Replace dirty filters, such as air, fuel; a poorly running engine is less efficient and burns more gasoline.

\* Change your oil and oil filter as specified in your manual

\* It must be cleared and fill the cooling system as recommended.

\* Replace old blades regularly. If your climate is harsh, purchase rubber-clad (winter) blades to fight ice build-up. Stock up on windshield washer solvent

\* Have your battery checked. The only

accurate way to detect a weak battery is with professional equipment. However, most motorists can perform routine care: Wear eye protection and protective rubber gloves. Scrape away corrosion from posts and cable connections; clean all surfaces; retighten all connections. If battery caps are

removable, check fluid level monthly. A word of caution: Removal of cables can cause damage or loss of data/codes on some newer vehicles, so always check your owner's manual first. Be sure to avoid contact with corrosive deposits and battery acid.

- Inspect all lights and bulbs. Replace burnt bulbs.

- Serious worn tires winter tires should be examined to stay in good condition when driving the vehicle• brake checking the vehicle periodically to prevent expensive repairs that can be caused by negligence.

- Regularly checking the vehicle brakes.

- Neglect often leads to catastrophic failure. Can routine testing and changing fluids and oils in the vehicle to prevent the periods prescribed reforms are very costly...

## Driving the vehicle during fog

Fog reduces visibility,

Fog causes many car accidents annually. In that it limits the ability of the vehicle commander to see the cars and other objects on the road, so it must be very careful when driving in fog.

Because the horizontal visibility is very limited, and it becomes exposure to motor vehicle accidents is greater than usual.

Must motorists to reduce speeds and attention; especially when form fog and low visibility in such periods of the year, and follow the weather bulletin.

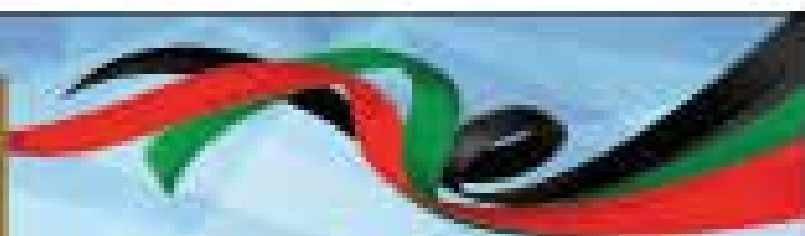

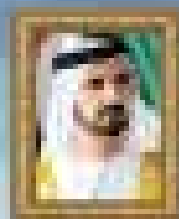

It also should drivers of vehicles on the roads

doubling relay distance between vehicles so that they are safe to avoid the impact of accidents and lack of overtaking and moving from lane to another in case of blurred vision.

He also stopped vehicles on the right shoulder preferably off the road times the lack of low visibility, and the use of warning signs to ensure their safety and driving cautiously and carefully, be patient and not to waive or change course and do not use high-lights in the vehicle because it reflects the fog hinder visibility, and do not use warning signs while walking.
