Traffic awareness and Back to school

There is no doubt that traffic awareness plays an important and effective role in educating our students, especially with the beginning of the return to schools, which constitute a collective opportunity prepared by the parents before their students, and the great carnival that the state is preparing for.

The partnership with various sectors and segments of society in spreading traffic awareness is of great importance in order to consolidate the concept of team work and team spirit to achieve the public interest and implement the strategy of controlling the road safety to achieve traffic safety on the various internal and external roads adopted by police leaders in the UAE. And is keen to translate it on the ground, to make the school year full of achievements free of any traffic accidents may harm our children students in all stages of education.

I also call the drivers of the vehicles during the transfer of children to schools and return them to observe the new rules and regulations of traffic, which aims to ensure maximum safety and safety for them and take into account the nature of traffic for the safety of everyone and responsibility by giving the opportunity for pedestrians to pass safely on all roads.

We are working through the police leadership in accordance with activities and programs synchronized with the new academic year in order to motivate students to adhere to the preventive requirements, which will contribute to the consolidation of positive behaviours in both traffic and security. This would not have been possible without the support of the wise leadership led by His Highness Sheikh Khalifa bin Zayed Al Nahyan President of the UAE and the keenness of the Government of the United Arab Emirates to build effective government competencies to ensure the emirate's vision of becoming one of the top five governments in the world.

Finally, I believe that the role of the family is no less important than those concerned with ensuring the safety of the students. It plays an important role in enhancing the supervision of the children and ensuring their safety in cooperation with the police, in addition to the role of the media in achieving the objectives of « And promote family awareness among all segments of society and school students, thus contributing to a safe and stable educational and community environment that is happy and positive for all our children.

Abu Dhabi Police launches new identity patrols

The General Directorate of Abu Dhabi Police (ADP GHQ) has recently launched its new identity in white and blue. It carries the new Abu Dhabi Police logo, which reflects its cultural heritage and reduces 60 years of achievement and security.

The patrols appeared in their modern form with two strips on their sides, reflecting the police officer's role, his role in maintaining security and security, and a reference to the cloth that appeared above the uniform of the security man while performing the tasks.

Abu Dhabi Police His Excellency the Major General Mohammad Khalfan Al-Rumaithi launched the patrols in a modern way during the ceremony, which marks the beginning of its operation and continues to carry out its tasks to keep up with the progress of its developmental achievements in various stages.

Abu Dhabi Police His Excellency the Major General Mohammad Khalfan Al-Rumaithi he said

The launch of patrols in a new way is an addition to the achievements of Abu Dhabi Police in the development and continuous modernization, and keep abreast of modern developments in the field of modern police work to provide high quality police services in accordance with the best advanced standards in the use of advanced mechanisms that

contribute to enable the police to perform their duties in the field in a manner that strengthens Values the positive and happiness and enhances public confidence in those services that are delivered with high quality that reflects the outstanding level of Abu Dhabi Police. "

"The launch of the modern format of the patrols is a reflection of the leadership's vision of preserving the country's capabilities, leading the global competitiveness indicators, and within the scope of the Abu Dhabi Government's strategy to improve services that meet the needs of the public and facilitate them easily and to enhance their role in maintaining security and stability gains. Within the concept of community partnership, stressing the continuation of efforts to develop modern police work and the use of modern technology, and to improve the level of performance to achieve the best results advanced in all sectors of the police at the hands of national elements, and stimulate creativity and innovation".

"To harness all available means to promote positive indicators in the areas of crime control, to promote

community awareness in prevention, public safety to prevent crime and reduce traffic accidents, and to strengthen the concept of community partnership in a way that enhances the sense of security of individuals to be helpful to the police”.

Abu Dhabi Police His Excellency the Major General Maktoum Ali Al-Sharifi said: “The police’s role is in maintaining security and spreading peace of mind in the community, enhancing awareness and education and encouraging compliance with the laws and regulations.

The General Directorate of Abu Dhabi Police presented the modern form of its role in the educational institutions and commercial centres in the capital to familiarize the community with these patrols and their role in establishing security and safety and spreading awareness in various police fields in order to enhance

preventive measures to combat crime, reduce traffic accidents and activate community partnership.

The aim of the periodicals is to enable the public to follow up on its initiatives and achievements in the development of police work, which have achieved positive indicators in the provision of policing services in accordance with the best international practices developed for the welfare of society.

Abu Dhabi Police launches campaign under the slogan "In their safety, our happiness"

As part of its campaign, «Abu Dhabi Police», launched a «stop» at the side of the school bus in both directions with a minimum distance of five meters to ensure that students pass safely and safely.

And urged drivers to abide by the amendments to the Regulations of the Law of Traffic and Traffic, which impose a fine of 1000 dirhams and the registration of 10 traffic points for this violation.

The executive regulations of the Traffic and Traffic Law stipulate a fine of 500 dirhams and the registration of six traffic points on the driver of the school bus in the event that a «stop» arm is not opened when the students take off or ride.

School bus drivers have to stop parallel to the pier and at authorized locations, and to operate front and rear «flashing» signals, while other vehicle drivers must stop at the side of the side-by-side of a single

stop for all vehicles traveling in both directions and full stop in double roads in the direction of the vehicle at a distance of not less than five meters.

And stressed the importance of strengthening the role of the school and parents, educational and administrative bodies, and school bus drivers, which contribute to the safety of students and work to motivate them to adhere to preventive requirements, which contribute to the consolidation of positive behaviors through.

Also stressed the role of the family in enhancing the supervision of children and ensuring their safety in cooperation with the concerned police authorities.

Also stressed the need for concerted efforts to achieve the goals of the campaign and to promote family awareness among all segments of society and school students to provide a safe and stable educational and community environment in our society.

جمعية ساعد للحد من الحوادث المرورية
SAaed Association for Prevention of Traffic Crashes

The phenomenon of traffic congestion and how to avoid them

Crowding is forced confinement in a closed car, even if it is an air-conditioned prison on a long, geographically short road. The traffic is too long and with great effort and nervous tension that the workplace may be on the second street. Is the crowding in our streets a tragedy in which the citizen and the resident face what Sizing was facing as he tries to climb the mountain and fall on the rocks pushing him down.

Crowding is no longer just streets filled with cars culture and conflict daily needs more than a dwelling, in need of some people to see surgery. This reads some of the vocabulary of the problem.

أخي سائق المركبة ، لتجنب الازدحام والحوادث المرورية غير المتوقعة وتفادي فتره الذروة !
 اختر طرقاً بديلة واحرص على الاستيقاظ باكراً و الانطلاق إلى وجهتك قبل وقت كاف.

Great efforts

Despite the great efforts exerted by the competent authorities in the capital to develop and modernize the internal and external road network to reduce traffic congestion, the problem is present, especially during peak periods, which are the times of staff heading to work and the departure time, including the evening, With huge numbers of vehicles, which sometimes extend to tens of meters.

All the major cities in the world suffer from traffic congestion due to the steady increase in the number of cars every year. All these cars join the roads, and the cities enter to increase the congestion. Roads no matter how wide they can accommodate all these large numbers of cars, That large numbers of cars

disappear and stop service, but their number remains limited compared to new cars.

Alternative Way

Whatever the proposed solutions, they are incomplete due to the complexity of the problem and its complexity. The congestion is a new phenomenon in the Emirate of Abu Dhabi, which is not familiar to the users of the road before, and is due to several reasons, including the great renaissance witnessed by the state and the resulting increase in the number of cars rapidly; Roads should be in place for a while. Alternative routes should be chosen to avoid traffic congestion, distance from peak times and staff departure time, as well as getting up early to avoid overcrowding.

Abu Dhabi Police Launches UAE Happiness Standard in Government Work

The first of its kind with Emirates Authority for Standardization and Metrology "Specifications"

General Command of Abu Dhabi Police Has announced the launch of Emirates' Business Excellence Standard, which was developed as part of its strategic initiatives to enhance business environment, through programs and services across all sectors and within the framework of the National Charter for Happiness and Positive, the first of its kind in the UAE community.

It is a framework that sets the state's commitment to its sons and daughters and residents on its soil. The UAE is a center and a global destination for the most distinguished government work, which establishes the concept of happiness and the content of positive as two basic values. It also helps to provide practical tools to measure the impact of happiness on all individuals, groups and segments of society.

SAAED celebrate the "The owners of determination" in Zayed Day for Humanitarian Action

Under the auspices of His Highness Sheikh Saif bin Zayed Al Nahyan, Deputy Prime Minister and Minister of Interior, Honorary President of the Saed Society, Saaed Association for the Reduction of Traffic Accidents Zayed Day for Humanitarian Action, which was dedicated to celebrate the "The owners of determination" and orphans in the Jumeirah Hotel Towers Union in Abu Dhabi.

This celebration comes in the wake of the late Sheikh Zayed bin Sultan Al Nahyan approach, and in recognition of his role in establishing the process of humane giving in the State. Within the framework of the association's participation in this group, During which the announcement of the activities «Achieve their dream» in the fourth year, which enhances the community partnership between the association and that important group in society.

Brigadier Engineer Hussain Ahmed Al Harthy, Chairman of Saaed Association, stressed the importance of the Society's strategy and its awareness-raising plan in promoting social partnership

with the stakeholders and communicating with them, preparing educational programs and achieving their aspirations, Their potential and maintain their safety and prevent them from traffic accidents.

He said that organizing the annual meeting with the stakeholders on the Day of Humanitarian Giving through the "Achieve their Dream" initiative aims at reviving authentic Emirati practices and enhancing community cohesion, cohesion and solidarity with those who contribute to their integration into society.

Al-Harthy explained that Saaed Association for Prevention of Traffic Accident is not limited to traffic awareness, but extends to support charitable and

community activities to promote community cohesion, solidarity and community partnership in the forefront of these priorities and programs for stakeholders.

He pointed out that the Association, through its strategic partnership with the Ministry of Interior to spread the traffic culture among all segments of the society, participated in many lectures, exhibitions and traffic awareness points and adopted many community initiatives that are important throughout the year to promote community responsibility and the dissemination of traffic culture among individuals the society.

Al-Harithi urged the drivers on the occasion of the holy month to enhance procedures in the areas of traffic safety and comply fully with the requirements and instructions that guarantee the safety of all.

Brigadier Jamal Al Ameri, Executive Director of the Association, said: "Our celebration today, in cooperation with our strategic partners on Zayed Humanitarian Day, organized For the fourth consecutive year Iftar under the theme" «Love and loyalty to Zayed Giving» ", part of the UAE Humanitarian Day.

His pride and gratitude in turn to establish the process of good and giving.

He stressed the concern to pay attention to these precious groups of society, and let them and encourage them and work to find appropriate opportunities for them to take their natural position in society.

For his part, Yousif Al-Masry, Director of the Department of Government Affairs, Health, Safety, and Environment at Al-Futtaim Motors expressed his thanks and gratitude to the association for allowing Al-Futtaim Motors to sponsor all its annual activities, including Zayed Humanitarian Day, which is a pride for all those who contributed to its revival. The safety of individuals not only while driving their cars on the roads, but wherever they are to contribute to building a safer and safer society.

The Director General of the Jumeirah Hotel, Al-Ittihad Towers, Stephen Fox praised the attention given by the association to the involvement of private institutions in the efforts to provide support and support to people with special needs so that they can overcome disability in various forms and activate their role in society as active and

productive individuals who have equal opportunity to show their talents and achieve their aspirations. In the various fields of life on an equal footing with their peers, stressing the keenness of the management of the Jumeirah Hotel Towers Union to strengthen cooperation with the management of the association to enrich this event through charitable initiatives that take place in the celebration of the day of tender.

The opening ceremony was initiated by a film presented by the Zayed Theater for the Arts titled "Do Good and Meet Good". The idea and the scenario of the artist Abdullah Bouhajous and filming, editing and directed by Suleiman Al Shehhi.

The student Hanaa Shukri presented a musical piece by playing the instrument and the student Iman Abbas presented a religious song.

Al Harthy and Colonel Al Ameri then distributed prizes to the winners of the draws and honoring the strategic partners of the association and the sponsors.

How to choose the right car chair for your child

Many mothers and fathers do not want to put the child in the back seat of the car because of the mistaken belief that some of them do not want to deprive his child of his tenderness and anger. Completely sit in the back seat. But it costs families a lot, where children are the first victims in the event of traffic accidents.

Faulty seating

In order to avoid these incidents,

many authorities in the country raise public awareness of the importance of the child's commitment to the rear seats in the car, to provide awareness sessions, while others offer chairs for each mother who entered the hospital from In order to be the first trip of the baby from the hospital to the house in the back of the car to get used to it small, and despite these efforts are still large families are putting children in the front chairs of the car or sitting in the back chairs, but without the

use of the chair allocated to this and that fits all Cent age.

Ensure child safety

While taking your child in the car with you, make sure that he is in perfect safety and follow the instructions to use the safety seat for children under the appropriate age to sit in the car, so keeping the child safe when riding the car is one of the most important responsibilities entrusted to you as a mother. Using your car seats helps you keep your baby safe.

Adjustment of radar control speeds on Al Faiya - Saih Al Shoaib road

Abu Dhabi Police has decided to adjust the speed of radar control on Al-Faiya road to 60 km / h for all light and heavy vehicles starting September 1, which will contribute to maintaining the safety of life and the smooth flow of traffic.

According to the Traffic and Patrol Directorate of Abu Dhabi Police, the results of the study on this road showed a high rate of traffic accidents during the first half of 2017.

It was noted that the proportion of light vehicles on the road had recently been increased, although it was mainly intended for heavy vehicles, resulting in an increase in the incidence of serious accidents.

The Directorate called on motorists to comply with speed limits on the road, in order to save lives and to contribute to raising traffic safety rates, which will protect all road users in the Emirate of Abu Dhabi.

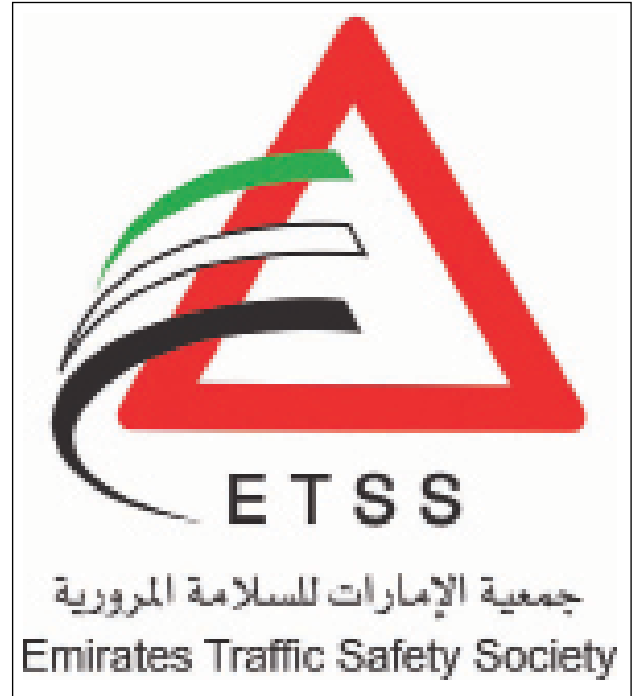

“Traffic Safety” in Abu Dhabi next November

The International Traffic Safety Conference will be held in Abu Dhabi next November under the title “The Impact of Education and Training in Traffic Safety” organized by the Emirates Traffic Safety Association in cooperation with the International Organization for the Prevention of Road Accidents, the Arab Organization for Traffic Safety and the World Health Organization.

Dr. Nasser Saif Al Mansouri, Chairman of the Scientific Committee of the Conference, stressed the importance of traffic education, which is a fundamental pillar in the educational system and one of the facets of comprehensive education that prepares the learner for social life by providing him with concepts in the fields of education, knowledge, skills,

He pointed out that education helps to raise a generation of good ethics, which is the first and last line of defences in the face of all the evils suffered by different societies, including risky behaviours when driving and use the road and the resulting traffic violations and loss of life and property. Traffic is a shared responsibility of all members of society.

On the conference axes, he pointed out that the traffic education and education in various age stages and training and rehabilitation of traffic are the two main axes dealt with by the conference in research and

research through the participation of a large number of experts and researchers specialized in the matter from within the country and from the countries of the world and learn about the experiences and international practices distinguished in this field.

Al Mansouri stressed the importance of protecting road users, especially students and school students, against the dangers of traffic accidents and the need to teach them and train them on traffic safety concepts and abide by traffic regulations and laws that guarantee their safety.

Penalty exceeded the red light of heavy trucks

The Ministry of the Interior tightened the penalty of passing the red light signal and classified it as one of the most serious traffic violations resulting in deaths and injuries according to official statistics and reports.

The length of the vehicle booking is doubled

According to the new schedule of violations, which began to apply, the length of the reservation of the vehicle doubled when the driver passed the red light, as the violation stated that «beyond the red light signal by light vehicles, as well as bypassing the red light signal by bicycles and the penalty of 1000 dirhams and 12 points and booking Vehicle for 30 days, "after having previously" registered 8 traffic points, and booked the vehicle 15 days, and impose a fine of 800 dirhams."

Working with the amended Regulations

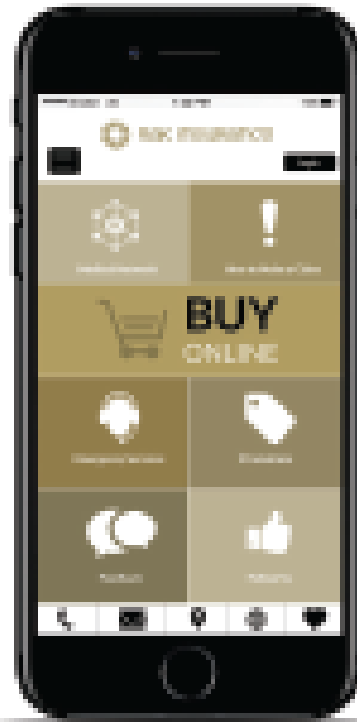

Traffic departments at the state level started working on the executive regulations amending the Federal Traffic Law No. 21 of 1995, in accordance with

Ministerial Resolutions 177 and 178 of 2017, on the rules and procedures of traffic control, which included the tightening of fines for dangerous offenses, notably race on the road and endanger the lives of others Red light.

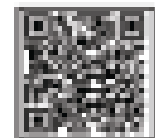

Pedestrians' commitment to light signals

Not only did the red light signal exceed the drivers, but also the pedestrians. The new amendments introduced a "pedestrian failure to comply with traffic signs" and a fine of AED 400. The General Directorate of Abu Dhabi Police has announced its readiness to implement the new rules and regulations on the drivers, as stipulated in the schedule of violations, fines and traffic points at the level of the Emirate of Abu Dhabi.

Dubai Police Launches "Smart Controller" to Control Road Security

The General Command of Dubai Police has launched the SMART CONTROLLER for Road Safety Control at the Garhoud Officers' Club. The launch was attended by General Abdullah Khalifa Al Marri, Command-er-in-Chief of Dubai Police and Brigadier General Saif Muhair Al Mazrouei, Director General of Traffic Department, and Dr. Abdullah Abdulrahman bin Sultan, Director of Future Vision Center, as well as experts from a Chinese company specialized in traffic safety systems. Al-Marri said that the Smart Controller is characterized by 9 characteristics of its predecessors. It includes an integrated system of technical features that helps traffic people to control road security, tighten electronic control of roads and focus on controlling dangerous violations committed by drivers, Dubai to make Dubai safe.

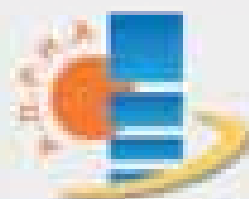

He added that the smart controller is keeping pace with the intelligent transformation in the various areas of police work and the use of modern innovations in support of the strategic objectives of Dubai Police. He pointed out that a technical team has been assigned to implement the intelligent control system, which will contribute to increasing the efficiency of external road control and road security control. Brigadier General Saif Muhair Al Mazrouei, Director General, said

For traffic in the Dubai Police, that the intelligent observer is characterized by previous control devices with high accuracy and clarity of his image, and enables him to move on metal barriers wirelessly. For his part, Captain Ali Al-Asami, the project manager said that the smart controller can be controlled by applying to smart phones and use it in several sites and places of events and warn pedestrians of crossing the highways, and the ease of installation and operation.

Students sit on the bus, protected by road surprises

School bus escorts must ensure that all students are seated during the course of the journey and that seatbelts are attached to seat belts, that the bus is free of students upon arrival at the end point, and that the guardian of each student under the age of 11 or Who is responsible for his or her arrival at the point of arrival, the seizure of any misconduct by the students and the safety of the passengers during the flight, and to inform the school transport coordinator of any incident, as well as help the students to cross the road and help evacuate the bus in case of emergency.

Daily bus inspection

School bus drivers must conduct a daily check of the

bus before driving the school bus, ensure that the bus is free of students upon arrival at the end point, and ensure that the entrances, exits and passages of the bus, including emergency exits, have no obstructions before the journey begins.

Commitment to speed limit

Drivers should not drive the bus faster than the permitted legal limit for each street, and not exceed 80 km per hour. In addition, no student will be allowed to leave at any point other than the place of departure without written instructions from the school and maintain its appearance.

And not to smoke or allow others to smoke inside the bus

Abu Dhabi Police activate 17 radar «Solar Power» from Alsudairh Tunnel to the intersection of Faqaa

Abu Dhabi Police has started to activate 17 solar-powered radars on the Al Maha and Al-Ashoush Streets, from the Seih Al-Sudairah Tunnel to the Al-Faqaa junction in both directions.

Brigadier Ali Khalfan Al Dhahiri, Director of Operations at Abu Dhabi Police said: "The activation of radars is part of Abu Dhabi Police's keenness to improve traffic safety in the Emirate of Abu Dhabi as part of its efforts to reduce road traffic fatalities and traffic accidents.

Avoid accidents

He added: The sites of new radars have been determined based on indicators of accidents and traffic violations, to reduce high speeds and avoid accidents, and the resulting human and economic losses.

He pointed out that the new radars are characterized by many technical capabilities to monitor violators accurately on all the paths of the road in both directions through high-precision laser devices to determine the distances between vehicles, pointing out that the new radars will monitor irregularities

exceeded the speeds of the road for light and heavy vehicles and monitoring violations of non-Leave enough distance and by-pass the shoulder of the road.

Radar speed Limits

Brigadier Khalifa Mohammed Al Khaili, Director of Traffic and Patrols Department at Abu Dhabi Police said that the radar was set to the following: The speed limit for light vehicles is 80 km / h. The speed of setting the radars for the light vehicles is 101 km / h. The speed of the heavy vehicles is 80 km / h. Radars for heavy vehicles 81 km hour). He stressed the importance of the presence of control devices such as radars on the roads to control the excesses, and improve the levels of traffic safety, so as to limit the excesses of speeds that endanger the lives of all users of the road, warning of the risk of exceeding the prescribed speeds. Al-Khaili urged the drivers to abide by the speed limits and leave a sufficient distance not only to avoid radar violations, but to enhance their safety, stressing the need for community participation in enhancing efforts to provide traffic safety.

Characterized by consolidating best winter tires on the snow (and also on wet or muddy surfaces) compared with summer tires. These tires have a pattern more depth allows the discharge of the snow and mud as effective and deep grooves and multiple sheets. This does not apply to any official standard tires in Europe. Although we find the marking «M + S» All winter tires, the icon that represents Snowflake Snow and mountain and called 3PMSF is the only one which ensures that the window frame wintry. Put this code by the manufacturers of America and Canada, and therefore all tires that carry this shortcut is classified in the category of winter tires.

Technical Features

Winter tires are different about summer tires in the following aspects:

In terms of the rubber

Winter tires are different tires about summer in

terms of the flexibility of rubber at low temperatures; it becomes effective when the temperature drops to less than ° 7 (on the contrary, when the temperature exceeds this class winter loses the frame of his performance).

In terms of the tread

Winter tire tread has differences compared with the typical summer frame where we find that a greater proportion of groove and platelet count greater than five times the frame summer sheets and broad central grooves allow drainage of water and the snow melted as fast.

Tips

It is recommended that the driver always has the same kind of tires and the same degree of damage on each tire the same axis and to monitor the pressure that must be higher than normal pressure of about 0.2 bar (reduce cold compression ratio).

Driving during mist Safety

instructions to avoid accidents

Mist Cause many car accidents each year, as it limits the ability of the vehicle commander to see the cars and other objects on the road, so it must be very cautious when driving into the mist, because visibility is very limited, and it becomes exposure to motor vehicle accidents is greater than usual.

Must motorists to reduce speeds and attention; especially when form mist and low visibility in such periods of the year, and follow the weather bulletin.

Don't overtaking

Should drivers of vehicles on the roads doubling relay distance between vehicles so that they are safe to avoid impact accidents, lack of overtaking and moving from lane to another in case of blurred vision.

Use warning signs

It is also preferred to stop the vehicle on the right shoulder off the road times the lack of low visibility, and the use of warning signs to ensure their safety and driving cautiously and carefully, be patient and not to waive or change course and do not use high-lights in the vehicle because it reflects the fog hinder visibility, and do not use warning signs while walking.

Concern about the road to mobile phone

The new executive regulation of the Traffic Law tightened the traffic violation by fines of 800 dirhams and 4 black traffic points after 200 dirhams and 4 traffic points to deter those who were not committed to traffic.

The violation of mobile phone traffic is a serious violation that may lead to accidents, such as being busy talking on mobile phones while driving, writing text messages, reading social media, makeup, or editing a gatherer.

Pink ladies Stands in Abu Dhabi

The Department of Municipal Affairs and Transport has been keen to upgrade its services to all segments of the society and meet the needs of population growth. It revealed the identification of 182 women's pink stands in multi-storeyed parking spaces with white boards and pink beds in various areas of the emirate. , And relieve them of the trouble of looking for Stands.

Distribution of Stands

In this regard, the Department indicated that the distribution of positions reserved for women included the following areas: Behind the Liwa Center with 26 positions, 18 positions for the Corniche area, 28 positions behind the Zakher Hotel, 18 positions behind the Ministry of Health, 26 positions on Liwa Street, 25 positions behind Al Noor Hospital, Al - Dana area behind the settlement. Stressing at the same time increase the number of pink positions with the completion of the implementation of other projects in the future, and more capacity cards as multi-storey parking is one of the primary solutions to the problems of positions and taking into account, in addition to the capacity to improve services, security and safety requirements.

500 درهم غرامة وقوف مركبة الرجل في المواقف الوردية

مركز النقل المتكامل يكشف عن تخصيصه 5 بالمئة من إجمالي عدد المواقف الطابقية في أبوظبي للنساء فقط حيث تم طلاؤها باللون الوردي وتحديد لها بلوحات إرشادية وبرصيف "وردي" وبناءً على ذلك يتم مخالفة الرجال في حال قاموا بإيقاف مركباتهم في هذه المواقف بمبلغ 500 درهم | الخليج

Stand up legally

In addition, parking operators will ensure that vehicles are legally parked and take appropriate action if men stop their vehicles in pink positions reserved for women, by issuing parking violations in unauthorized locations and vehicle queues.

Achieving greater safety

It is worth mentioning that the multi-storey parking buildings in the Emirate of Abu Dhabi provide multiple services to achieve the greatest safety and comfort to the public, and features a system allows parking of vehicles with ease and easy, as green indicates the vacant position, and red on the user, The entrance of the building to facilitate the movement of entry and exit, in addition to the use of environmentally friendly technologies to reduce energy consumption, ventilation system on all floors.

Reducing the speed of the streets of "Sheikh Mohammed bin Zayed" and "Emirates"

The Dubai Roads and Transport Authority (RTA) and the Dubai Police General Command have decided to reduce the maximum speed of Sheikh Mohammed bin Zayed and the UAE from 120 km / h to 110 km / h to reach radar speed after adding the specified margin to 130 km / h. , As of October 15, as part of the efforts of both sides in reducing traffic accidents and ensure the safety of road users.

Extensive studies of traffic safety

"The reduction of speed on this part of the Sheikh Mohammed Bin Zayed and UAE streets came after extensive studies of traffic safety and the analysis of traffic accident data and its causes during the previous years," said Mitha bin Oday, executive director of Traffic and Roads Authority in Dubai. Traffic safety requirements such as pedestrian bridges, safety barriers, truck shelters, which will achieve the vision of the body as desired.

Increase the capacity of the streets

She pointed out that the current capacity of the drivers is 12 thousand per hour, in each direction, with 7009 vehicles on Sheikh Mohammed Bin Zayed Road towards the Emirate of Abu Dhabi, where the proportion of trucks is 6%, while the number of vehicles traveling through Sheikh Mohammed bin Zayed Road to Emirate The number of vehicles traveling to the Emirate of Sharjah via the Emirates

Road is estimated at 3416 vehicles, and the number of vehicles in this direction is 12% To 14% of truckloads in this direction.

Maintain safety and reduce accidents

She added that the decision comes in order to preserve public safety primarily, along with the reduction of traffic accidents caused by speed, especially since the streets are witnessing a large proportion of the traffic of heavy vehicles on both directions, confirming that the speed control is one of the most effective measures to reduce traffic accidents, Especially as the speed limit mechanism depends on several factors, including the design speed of the road and the actual speed, which is committed by the majority of drivers, the level of urban development on both sides of the road, pedestrian traffic, the presence of schools, mosques and other vital facilities, and the level of accidents Which occurred in the street and traffic volume, coupled with high probability of multiple vehicle accidents.
